Education

Pimpri Chinchwad College of Engineering (PCCOE), Pune — Dec 2021 - Jun 2025
B.Tech. in Information Technology Engineering — ***CGPA:7.83/10***

Skills

Languages: Java, JavaScript, TypeScript, SQL
Frontend: React.js, Next.js, Redux, Tailwind CSS, Sass, Styled Components
Backend: Spring, Spring Boot, Spring MVC, Spring Data JPA, Node.js, Express.js, REST APIs
Databases & ORM: PostgreSQL, MySQL, MongoDB, Drizzle ORM, Prisma ORM
Tools & Technologies: Git, Maven, JUnit, Unix/Linux, JWT, Vercel, Render
Problem Solving: LeetCode **Knight (1847) • 650+ Problems Solved**

Work Experience

Capgemini, Pune — Sept 2025 - Present

Software Developer

- Contributed to the development of a **customer dashboard** serving **10,000+ users**, building responsive features using **React** and integrating them with **Java/Spring Boot** backend services.
- Built and maintained **25+ reusable React components**, implementing modular UI patterns to improve code reusability, consistency, and maintainability across the application.
- Optimized frontend performance using **code splitting, lazy loading, and memoization**, increasing **Lighthouse Performance** scores from **68 to 95**.
- Developed **10+ REST APIs** using **Java, Spring Boot, and Spring MVC**, implementing request validation, exception handling, authentication, and unit tests using **JUnit**.
- Worked with **Spring Data JPA, SQL, and microservices-based services**, using **Maven** for dependency/build management and **Git** for version control and team collaboration.

Whatbytes, Bengaluru — Dec 2024 - Jun 2025

Frontend Developer Intern

- Developed customer-facing **hotel booking** and **admin platforms** using **Next.js, React, TypeScript, Tailwind CSS** and **Redux Toolkit**, building **30+ reusable components** and maintaining **20+ application pages**.
- Designed and developed **10+ REST APIs** using **Node.js, Express.js, PostgreSQL, and Prisma ORM**, managing **5+ database models** and optimizing **20+ database queries**.
- Implemented secure authentication and authorization using **JWT**, **NextAuth.js**, and **Clerk**, along with **2+ payment workflows** including **2C2P** and bank transfers.
- Optimized frontend performance through **code splitting, lazy loading, and asset optimization** and integrated interactive location-based hotel maps.
- Deployed frontend and backend applications on **Vercel** and **Render**, ensuring reliable end-to-end application delivery while implementing request validation and centralized error handling.

Projects

DineHub – Good Food, Delivered — Live | GitHub

- Built a full-stack **food ordering platform** using **React and Spring Boot** with restaurant discovery, menus, favourites, cart, addresses, and order management.
- Implemented **JWT-based authentication and role-based access control** for customers and restaurant owners.
- Integrated **Stripe Checkout** with payment verification for secure order processing and automatic cart clearing.
- Developed restaurant-owner functionality for managing **menus, inventory, restaurant details, and orders**.

Tech: React, Redux, Material UI, Tailwind CSS, Spring Boot, JPA, PostgreSQL, JWT, Stripe, Docker, Render, Vercel

Unsaid – Stories and More — Live | GitHub

- Built a **full-stack blogging platform** with rich-text editing, drafts, scheduled publishing, and responsive themes.
- Implemented **JWT authentication**, comments, reactions, bookmarks, follows, profiles, and activity feeds.
- Developed secure **REST APIs** with **Node.js, Express, and PostgreSQL**, featuring validation, rate limiting, pagination, and search.
- Integrated **Cloudinary uploads**, email notifications, scheduled jobs, and backend tests.

Tech: React, Node.js, Express, PostgreSQL, JWT, Cloudinary, Multer, Nodemailer, Node-Cron
